

COHEN HOOPER

Age 13 ***Pymatuning Valley Middle School***

Some things just come naturally and for 8th grader, Cohen Hooper, the ability to write code is a walk in the park.

Cohen has excelled at developing and coding websites in HTML, developing code for video games in JavaScript, and how to code circuit boards for machine interfaces. He often adds extra details that surpass the requirements for the assignment. What he doesn't already know, he quickly learns, and is happy to pass along his knowledge to his classmates to help them succeed, instead of stealing the limelight. Cohen's teacher, a software engineer with 32 years of experience, said she would recommend Cohen for any job right now, as he possesses such a deep understanding and excitement for the industry.

Cohen also uses his critical thinking capabilities to achieve high results in his algebra lab. His ability to solve advanced problems is impressive. Even though he is gifted in very difficult subjects, he is a well behaved young man and modest about his capabilities.

Cohen enjoys playing baseball for Pymatuning Valley and is also very active in the youth group at Believers Church in Warren.
